DETAILED ACTION

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I; claim(s) 1-20, 27, and 28; drawn to method and apparatus for determining data related to the shape of a wavefront.

Group II, claim(s) 21-25, drawn to a diffractive optical element.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Independent claims 1 and 27 include an aberration means, a detection means, and an output device. Independent claim 19 includes the steps of transmitting, detecting, and sending. The detecting means, output device, and all the method steps are not found in claims 21-25. Therefore claims 21-25 lack the corresponding special technical features found in claims 1-20, 27, and 28.
